

LENORA GRAY

DATA SCIENTIST, TECHNICAL EDUCATOR

Washington, DC | lenora@lgvallc.com

Data scientist and applied AI researcher with expertise in information retrieval, machine learning, and large-scale data analysis. Experienced in communicating complex technical concepts to interdisciplinary audiences through conference presentations, industry training, and collaborative research. Author of peer-reviewed publications in AI and information retrieval and recipient of the ICAIL Best Paper Award. Seeking an instructor or lecturer position where I can teach data science, machine learning, and applied artificial intelligence while integrating real-world industry experience into the classroom.

AREA OF EXPERTISE

Teaching & Technical Communication
Data Science & Statistical Analysis
Python Programming
Data Visualization (Tableau, AWS Quicksight)
SQL & Data Management
Technical Presentations

Exploratory Data Analysis
Machine Learning Fundamentals
Curriculum Support & Instructional Materials
Technical Presentations Applied Analytics &
Problem Solving
Applied Analytics & Problem Solving

KEY ACHIEVEMENTS

- Led development and evaluation of NLP and machine learning models, improving classification accuracy and efficiency in large-scale datasets.
- Designed and delivered internal trainings and workshops, helping teams understand complex analytical concepts and apply them effectively.
- Created reproducible analytics pipelines and dashboards, streamlining decision-making and improving accessibility of insights.
- Translated technical model evaluation metrics (precision, recall, F1) into actionable guidance for diverse stakeholders.
- Mentored junior analysts and team members, fostering technical growth and improving team-wide understanding of AI/ML workflows.
- Developed practical frameworks and documentation for model interpretation, enabling faster adoption and trust in analytical results.

PROFESSIONAL EXPERIENCE

Associate Director, Data Science
Elevate Law

Nov 2022 - Present

- Lead client-facing analytics engagements, translating complex data science concepts into clear explanations for legal teams and non-technical stakeholders.
- Design and conduct exploratory data analysis and predictive modeling workflows using Python and modern analytics platforms.
- Create visualizations and analytical summaries that communicate insights effectively to diverse audiences.
- Mentor collaborators and guide teams through analytical methodologies used in technology-assisted review (TAR).
- Document analytical workflows and data structures to support reproducibility and knowledge transfer.

Data Scientist
Redgrave Data

Oct 2021 - Nov 2022

- Conducted exploratory data analysis and statistical modeling on structured and unstructured datasets.
- Designed predictive models supporting technology-assisted review workflows in legal analytics.
- Presented analytical results to clients and collaborators through written reports, presentations, and visualizations.
- Documented data models, data lineage, and analysis methodologies to support transparency and learning.
- Collaborated across interdisciplinary teams, helping stakeholders understand analytical methods and results.

Senior Advisor
Redgrave, LLP

Oct 2021 - Nov 2022

- Led technical aspects of consulting engagements involving complex data analysis and legal technology workflows.
- Communicated analytical findings and recommended strategies to clients through presentations and written reports.
- Provided guidance and mentorship to team members on analytical techniques and data interpretation.
- Ensured high-quality analytical deliverables through review, documentation, and quality assurance processes.

EDUCATION

Master of Science in Data Science

Nov 2024

John's Hopkins University

Bachelor of Science in Computer Science

Dec 2021

Florida Atlantic University

TEACHING AND TECHNICAL COMMUNICATIONS

Regularly present technical topics related to artificial intelligence, machine learning, and data science to diverse audiences including technologists, legal professionals, and policy stakeholders. Experienced in explaining complex technical concepts such as generative AI, technology-assisted review, and machine learning evaluation methods in accessible terms. Invited speaker and panelist at national conferences and professional training events on AI and legal technology; full list of peer-reviewed publications and invited presentations available in CV.
